I am trying to remove special characters and numbers from string using java regular expression. Here is my code: String Input= "4/1/2017 - 05:54:24 PM - text \$1.00"; Pattern Pattern = Pattern.compile("-"); Matcher Matcher = Pattern.matcher(Input); System.out.println(Matcher.matches()); I am getting false as output. Can someone help me with this? A: You must use the matcher.reset() method. It resets the matcher. String input="4/1/2017 - 05:54:24 PM - text \$1.00"; Pattern pattern = Pattern.compile("(\\d+)|([

but I can't find the unlockcode. 1) All maps must be MapSource versions - not gmapsupp.img;. 2) Begin Free Trial, 3) Enter Product Key, and 4) Connect to a Garmin GPS, . 5) City Navigator - Japan RF Topo Up to Version 6.12 3) A TOPO Germany map with the addition of the GTM 2011 mapset. 1) All maps must be MapSource versions - not gmapsupp.img;. 2) Begin Free Trial, 3) Enter Product Key, and 4) Connect to a Garmin GPS, . MapUpdate is software that helps you create maps using MapSource data (they are separate products, but MapSource and MapUpdate is a software suite that has MapSource and MapUpdate as parts of it). It is used by the pros like San Diego airport. From MapSource, you can use the free and 2d92ce491b
