Feb 15, 2012 Pro v7.0.2010.30. Crack-Serials  
[Aneesoft 3D Flash Gallery 2.4.0.0. A: The message you get is explained here. A: Is it possible to update to a newer version and reinstall the software if i got it from the aneesoft site? Yes, you can. But it's a bit complicated, so you'll have to read the documentation to see what's required. Is there

---

any way i could update to a newer version of the program from aneesoft site? No. Q: Using fixed points of continuous map to prove Theorem of Extreme Value. I would appreciate any help on this problem: Let  $f:A \rightarrow B$  be a continuous function between metric spaces and  $a \in A$  is a fixed point of  $f$  (or, a fixed point of  $f|_{A \setminus \{a\}}$ ). Prove that  $f(a)$  is the least upper bound of  $f(A)$  (or, of  $f(A \setminus \{a\})$ ). I think that to prove this we should use Bolzano-Weierstrass Theorem. A: It is sufficient to prove the result for bounded  $A$ . By Weierstrass, we can then extend it to arbitrary  $A$  using limits. Let  $A$  be bounded.  $a$  is a fixed point. By the boundedness of  $A$ ,  $B$  is also bounded and hence has a minimum. The image of the minimum is also the image of  $f(a)$ ; since  $f$  is continuous,  $f(a)$  is the least upper bound of  $f(A)$ . Conversely, if  $f(a)$  is the least upper bound of  $f(A)$ , and  $a$  is an arbitrary point, then  $f(a)$  is the minimum of  $f(A)$ ; the image of the minimum must be the maximum of the image of  $f(a)$ , which is the minimum

---

of \$f(A)\$\$. Q:
