

Watch full film at Official site in best quality!For only at easy fast direct link You can watch as much as you want in full length.

Download Lagaan: Once Upon a Time in India 720p High Quality Full Movie Download for free.Q: How can I get text from a label

on a form, when the label is clicked? I am trying to have a separate class monitor a form for the state of a radio button. I have a lot of radio buttons on a form, and I don't want to make a separate class for each radio button. Instead, I want to have a label for each radio button, and I want to run a function if the label is clicked. Here is

```
my code so far: from Tkinter import * class RadioTest(): def
__init__(self, master, state = "off"): self.state = state self.master =
master self.refresh = Button(master, text = "Refresh", command =
self.refresh) self.refresh.grid(row = 0, column = 0, sticky =
"nsew") self.master.grid_columnconfigure(0, weight = 1)
self.master.grid_rowconfigure(0, weight = 1)
self.refresh.grid_columnconfigure(0, weight = 1)
self.refresh.grid_rowconfigure(0, weight = 1) self.lbl =
Label(master, text = self.state) self.lbl.grid(row = 1, column = 0,
sticky = "nsew") self.refresh.grid_columnconfigure(1, weight = 1)
self.refresh.grid_rowconfigure(1, weight = 1) def refresh(self):
print self.master.state root = Tk() RadioTest(root, state
```
