What's New In IMG Extractor?

IMG Extractor is an advanced image extraction tool. It will extract the images from a webpage and display them in a new page. It's like a photo gallery, but you don't need to download the images separately. You can change the title, description, and keywords of the images. You can also resize the images. It also has a text to speech (TTS) feature for your images. You can also add an auto play sound effect to play the TTS at the same time when you open the images. It has a thumbnail feature for faster image previewing. It also has a right-click menu to export all images to an HTML file. You can also keep the images in their original size. Also, it can keep the original links of the images. IMG Extractor also has a live preview function. You can keep track of the changes as you edit the page's images. When you open a new page with a lot of images, it takes a while to open them. IMG Extractor fixes this by optimizing the loading of images. IMG Extractor also supports iframes. You can also change the site-wide and page-wide default settings. The general settings are for the frames and the iframes are for the iframes. IMG Extractor has an intelligent image detection algorithm. It checks the page for the IMG tags and saves only the images that have the IMG tag. IMG Extractor also has some additional features. See the list below. Javascript support: · It supports both IE and Firefox. The interface may be different from Maxthon's default Web Browser interface. Auto preview: · You can set a thumbnail to open when you hover over the image. · When you are finished changing images, you can save the list to a HTML file. · You can also assign a description and keyword to each image. Description: · The description you set will be displayed under the image when you view it in a new tab. Right-click Menu: · You can right-click on any image to open a context menu. You can remove the image, change the orientation, resize the image, or set the thumbnail to play an auto play sound when you open it. Text to speech: · You can set the IMG Extractor to automatically play an audio file when it's loaded or when you open a new page with images. Smart preview: · You can set the preview size of images. The default size is 768x512. · The default width and height can be adjusted. The maximum width and height can also be adjusted. Firefox setting: &
