Mice treated with clomipramine (5 mg/kg per day, i.p.) for 21 days showed antidepressant-like effects in the forced swimming test (FST) and tail suspension test (TST), but KYNA (1.2 mM, i.p.) failed to influence the antidepressant-like effects of clomipramine in these tests. However, a single administration of KYNA on day 21 of clomipramine treatment facilitated the antidepressant-like effects of clomipramine in the FST and TST. These results indicate that KYNA might facilitate the
