Products Rational In 1995, Autodesk was a consulting company, but in the early 2000s it started to build its own CAD products. In early 2004 Autodesk acquired Marc Mayer's Rational Software (formerly Autodesk RMS) and created an in-house product strategy, including Inventor, the "go-to" product for mechanical engineering and architectural design. Inventor was first introduced in December 2005 and was quickly adopted by the industry. In 2008, a new generation was released called Inventor R12 (2010), which made the product more user-friendly and easier to use. It also provided more functionality for mechanical, electrical, architectural, construction, and landscape design. The Inventor platform has evolved over the years, which has resulted in a variety of different design and functionality options. The current version is Inventor R16 (2011) and it was released in September 2010. AutoCAD In March 2005, Autodesk released AutoCAD LT (now named as AutoCAD a1d647c40b
