Airac Navigraph AIRAC Cycle. An approach for synthesizing carbonyl-substituted arylboronic acids under mild reaction conditions via [2,3]-rearrangement of homoallylic alcohols. [reaction: see text] We developed a method for the preparation of carbonyl-substituted arylboronic acids. The key step of this method is a remarkable [2,3]-rearrangement of homoallylic alcohols under mild reaction conditions to afford ketal intermediates. The reaction can be completed in 72% yield in 24 h. **To create a provisioning template** The following `create-template` command creates a provisioning template and returns it in an output.
