Licensing AutoCAD is a complex process. The most inexpensive license is AutoCAD LT, which is free to use to develop, print, and share technical drawings. AutoCAD Basic, AutoCAD LT, AutoCAD Design and AutoCAD LT Advanced require a nominal software annual subscription fee, while AutoCAD Premium and AutoCAD Architecture require a nonrefundable $3,000 one-time software license fee. AutoCAD is available as a perpetual license, but the cost of AutoCAD ST is $30,000 USD per user. AutoCAD is available for licensing on Windows, macOS, Android, and iOS. When running a program called AutoCAD, there are a few things you might want to know. In AutoCAD, the "What's New" tab shows a list of changes that are available in the current release. There is a "Show old text" button at the bottom of the status bar. It opens a text box that allows you to view older versions of all the parameters that appear on the status bar. For instance, in the bottom right corner of the status bar in the image below, the "Size Units" parameter currently shows 0.020. Hover your mouse pointer over this text to see what the original value was. When you install a new version of AutoCAD, older versions are automatically deleted. You can view the old version of the status bar by clicking the "Show old text" button. Finally, clicking "Help" on the status bar opens the AutoCAD Help screen. How to use AutoCAD How to start AutoCAD The AutoCAD LT app will start automatically, so you can use the program immediately. AutoCAD LT can be installed on a portable media drive. In such cases, the app can be run from the hard drive of the device, without requiring an internet connection. If there is an internet connection available, you can connect to the internet from the AutoCAD LT app. A typical setup requires that the app be installed on an SSD or other fast storage. To start the app, press and hold the Windows Key and click on the app's icon. You can move or delete the app's icon using Windows Explorer or the Windows 10 file explorer.
