## Gab-Stopper Crack+

Gab-Stopper Free Download is an easy-to-use voice level monitoring and feedback tool. Designed primarily for classroom noise control, the application is also useful in offices, meeting rooms, hospitals and more. Using graphical symbols, Gab-Stopper provides easy feedback in the form of a standard traffic light. Green indicates acceptable voice levels. Yellow means warning and indicates increasing voice levels. Red means alert and indicates sound levels are

---

unacceptable. Optional.wav sounds can be played on the computer when warning or alert levels are reached. As an incentive for students, Gab-Stopper provides an automatic score indicator ranging from 0 to 100%. If voice levels are kept low, the score bar increases. If voice levels rise, the score bar decreases. This feature can be used as a continual feedback and reward mechanism. While Gab-Stopper's primary purpose is to function as a teacher's aid, it is also well-suited for other uses. For instance, parents can use the tool to help control noise in the home, especially when some

---

quality time is desired. Gab-Stopper is suitable for any venue where noise is a problem. Gab-Stopper provides functions and features similar to electronic devices. These devices also monitor noise levels, but are somewhat limited in their ability. They are unable to filter incidental noises such as coughs, door-closure, or book-drops. In addition, these devices are generally inflexible and can be somewhat expensive. To operate Gab-Stopper in the best possible conditions you will need a quality microphone with good sensitivity and dynamic range. Here are some key features of "Gab

---

Stopper":  Traffic signal with red, yellow, and green indicators

Sound level meter indicates noise levels  Score-bar [0 to 100]

provides positive incentive

Configurable noise detection setting prevents "triggering" on incidental noises

Adjustable sensitivity to detect voices at a distance.

Choose optional sound.wav file to play when warning (yellow) or alert (red) occurs  Timer displays

elapsed monitoring time  Optional magnification for distance viewing

Required Software:  Digital

Camara  Sound-card (PCI or

Soundblaster)  VGA Monitor

---

Sound-card [?] Speakers (optional)

Limitations: [?] 14 days
